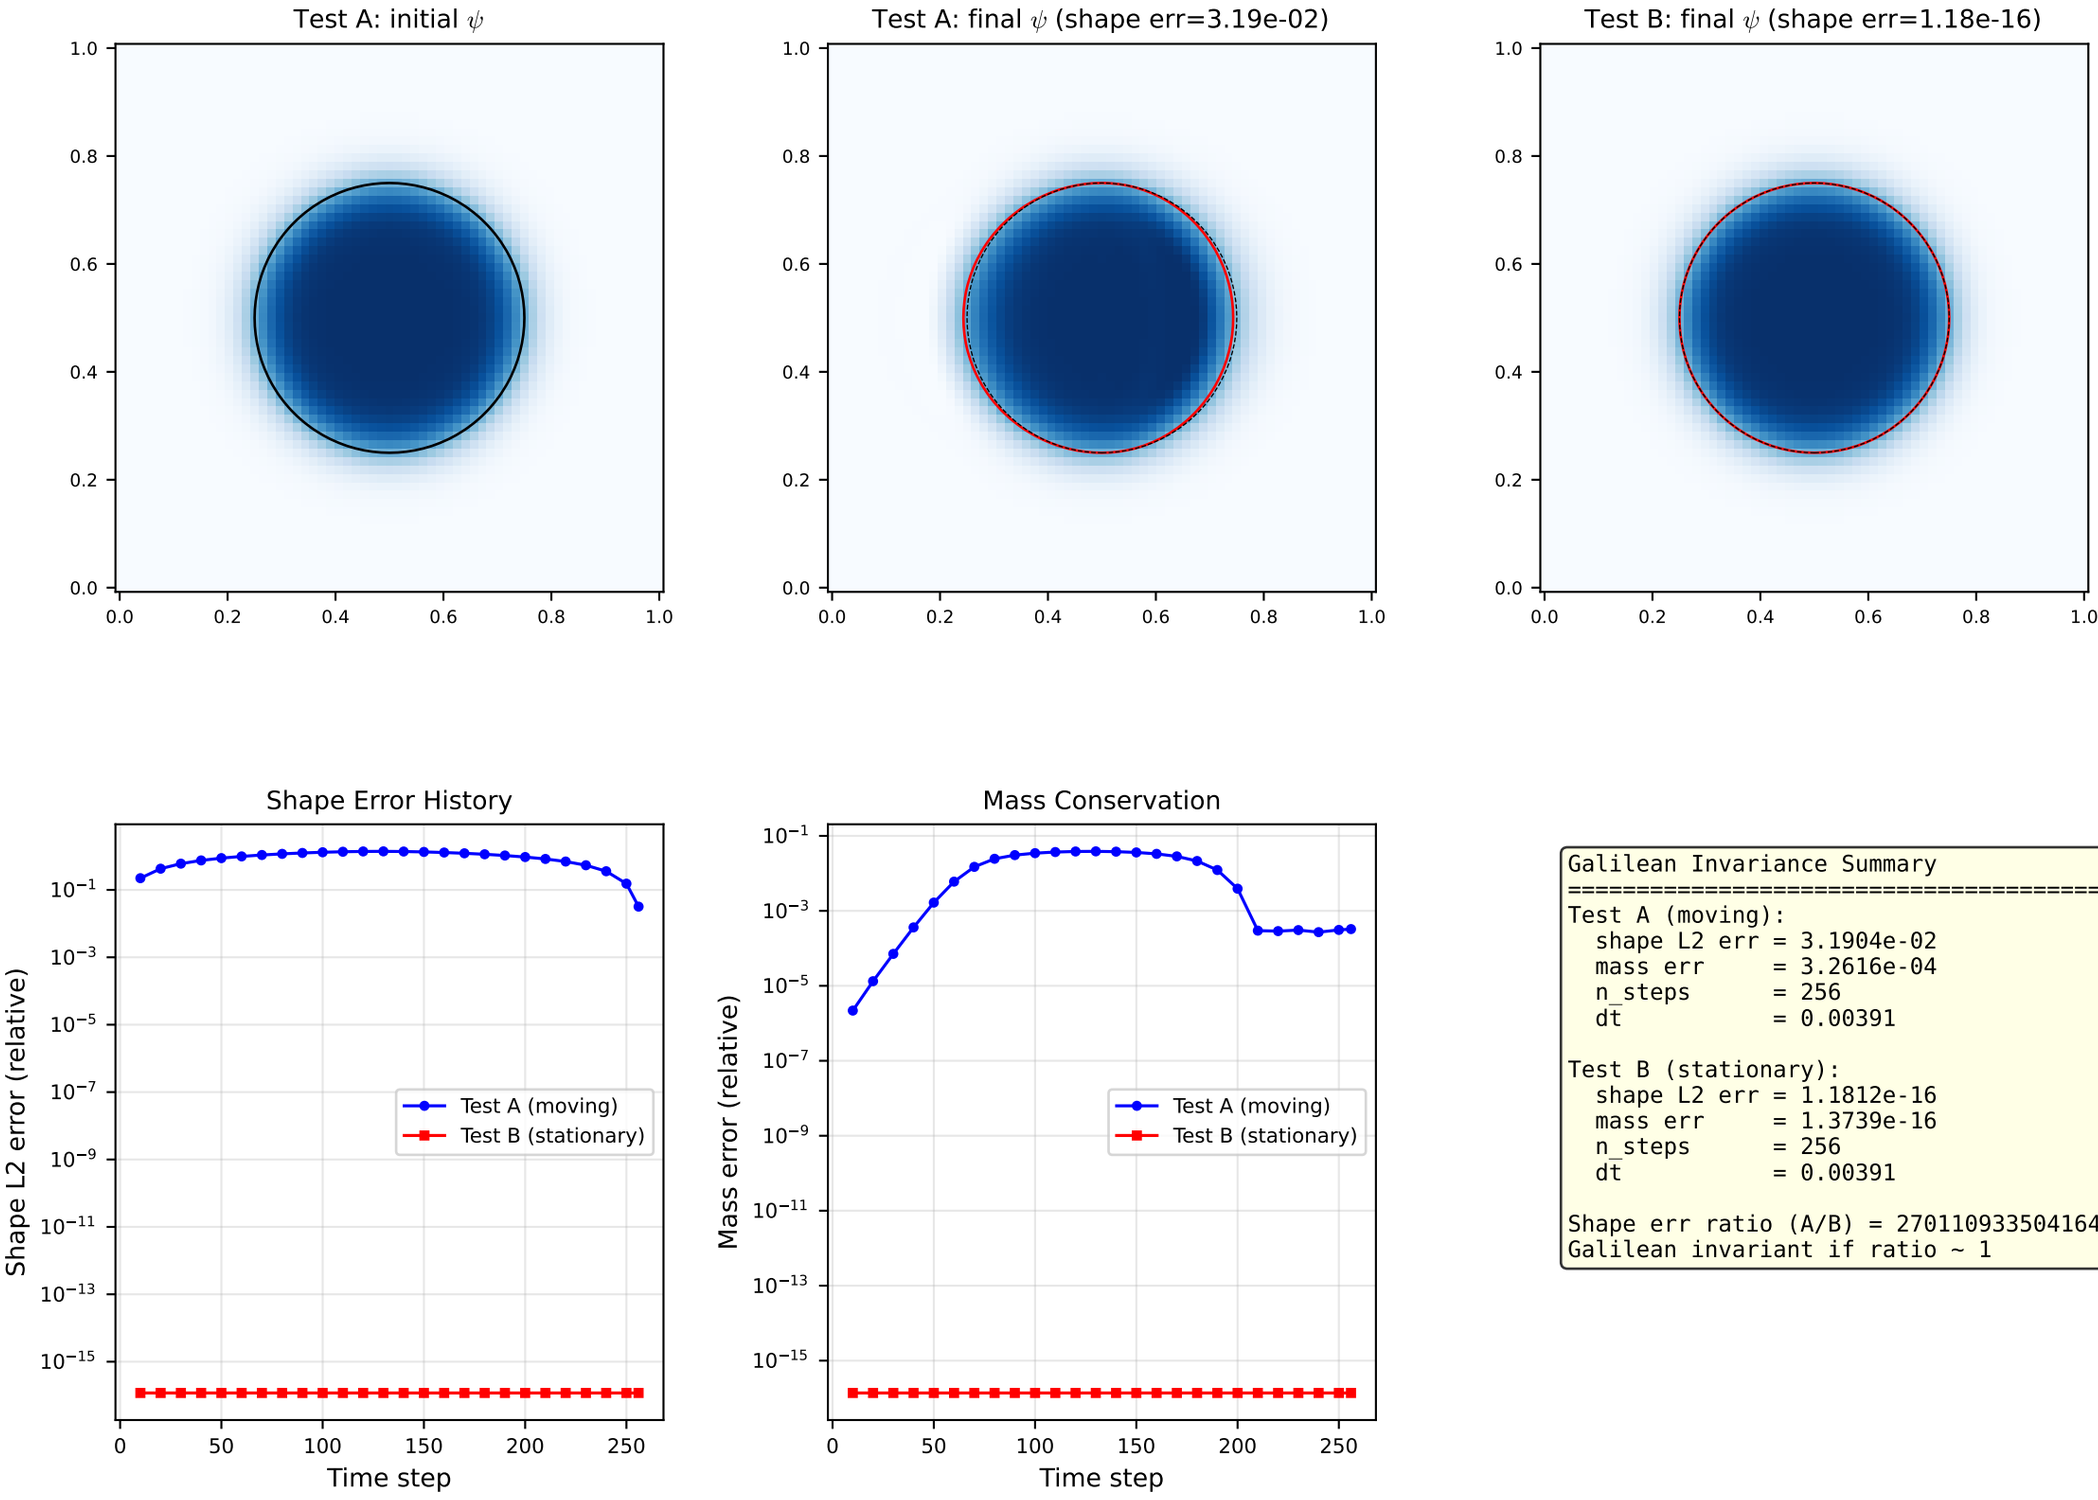
Galilean Invariance Test ($\sigma = 0$, CLS advection)
$N = 64$, $R = 0.25$, $\rho_l/\rho_g = 2$, $u_{bg} = 1.0$, 1 traversal(s)



```
Galilean Invariance Summary
========================================
Test A (moving):
  shape L2 err = 3.1904e-02
  mass err     = 3.2616e-04
  n_steps      = 256
  dt           = 0.00391

Test B (stationary):
  shape L2 err = 1.1812e-16
  mass err     = 1.3739e-16
  n_steps      = 256
  dt           = 0.00391

Shape err ratio (A/B) = 270110933504164.84
Galilean invariant if ratio ~ 1
```
